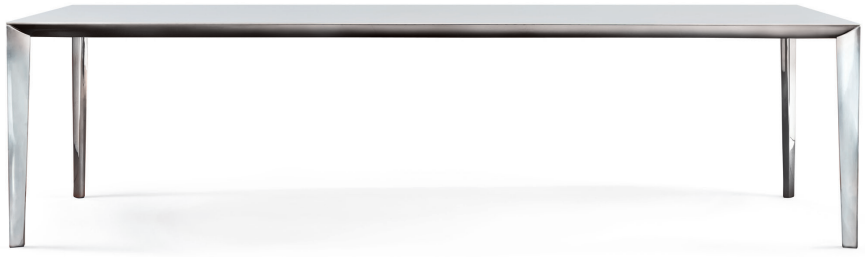
FILIGREE —
RODOLFO DORDONI 2013



Filigree is a range of fixed size and extension tables. The technology used in the discreet Filigree main element allows an extendable table with an invisible lateral telescopic system. The entire top is without cuts, and extends to double its size. It allows the maximum use of space thanks to the outer legs, minimum thickness of the tops, and above all its mechanism containment structure and extensions which are only 38 mm internal thickness. The tables are available in different materials and finishes to meet all needs.
