# Introduction

## Introduzione

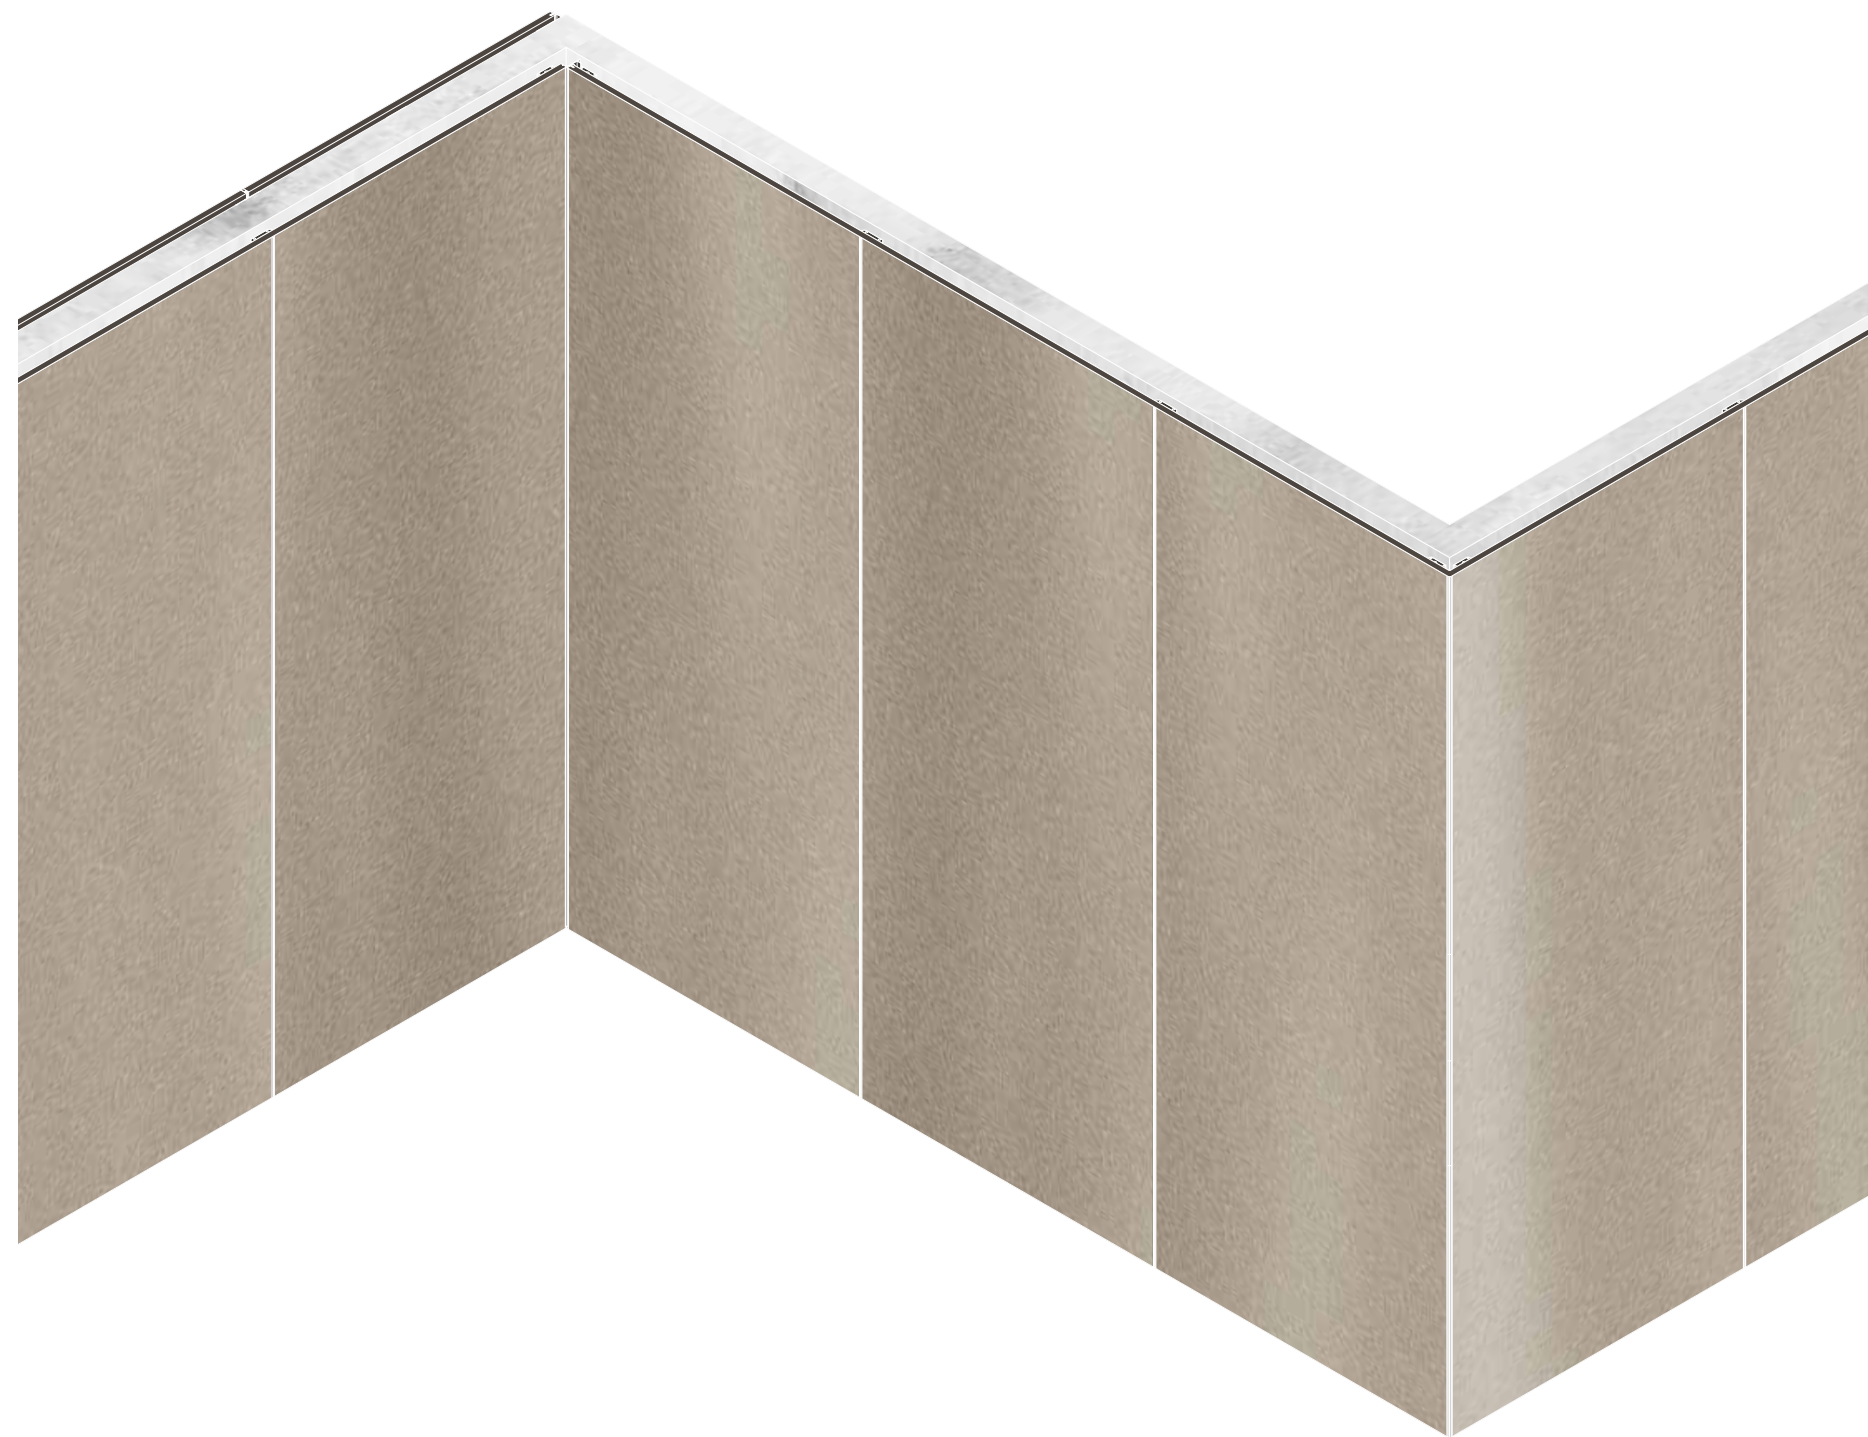

Molteni&C dedicates a catalog to the expansive realm of doors and boiserie, which have always stood as essential elements in architectural approaches and various furnishing solutions. The company invests significantly in research and development to introduce avant-garde technical innovations alongside aesthetic considerations, remaining poised to understand and anticipate continuously evolving lifestyles.

Three key players emerge, each embodying a distinct identity: Arial, the boiserie and door system, offers complete customization of interior spaces. Sincro enhances the concept of sliding doors by seamlessly blending impeccable mechanical performance with minimalist design. Sistema 7 revolutionizes partition walls and hinged doors, evolving them into advanced architectural solutions through a patented tilting mechanism.

Molteni&C dedica un capitolo al vasto mondo di porte e delle boiserie, da sempre un elemento indispensabile nell'approccio architettonico e in tutte le soluzioni d'arredo su cui l'azienda investe in ricerca e sviluppo per proporre visioni tecniche all'avanguardia, in parallelo alla sensibilità estetica, pronta a cogliere e anticipare gli stili di vita in continua evoluzione.

Tre protagonisti, ciascuno con una chiara identità: Arial, il sistema di boiserie e porte, offre una personalizzazione totale degli spazi interni; Sincro eleva il concetto di porte scorrevoli unendo prestazioni meccaniche impeccabili a un design essenziale. Con Sistema 7, le pareti divisorie e le ante battenti si trasformano in soluzioni architettoniche avanzate grazie a un meccanismo basculante brevettato.

# Boiserie

# ARIAL BOISERIE

Studio Klass

Arial expands the concept of boiserie, transforming it into a unique architectural design scenario for interiors.

*Arial amplia il concetto di boiserie trasformandolo in un inedito scenario di progettazione architettonica per gli interni.*

Studio Klass, renowned for its meticulous approach to design, elevates every space with elegance and sophistication. With the introduction of the Arial boiserie and door system, the studio presents a refined expression of decorative art infused with timeless allure. Pushing the boundaries of traditional boiserie, Arial transforms interiors into dreamscapes of architectural beauty. From its distinctive decorative panels to its versatile door configurations, Arial offers bespoke solutions tailored to each space's unique contours.

Designed to accommodate spaces where thoughtful decoration is paramount, Arial offers limitless customization possibilities. Its purpose is to enhance the beauty and magnificence of every environment while prioritizing comfort and well-being. Today, adorning walls with Arial boiserie and doors signifies a commitment to timeless elegance, harmony, and luxury.

Every interior space aspiring to express its decorative essence should embrace the sophistication of this exquisite piece. Crafted with lightweight yet durable aluminum profiles in Iris and Pewter finishes, Arial's supporting structure provides the perfect canvas for panels available in primary oak essence, sunrise, coffee, and black. With a myriad of finish options, including lacquer and the luxurious Blend textile from the Gliss master range, Arial ensures seamless integration into any interior scheme. Meticulous attention to detail extends to the skirting board and upper trim, offering three customizable solutions to meet the most discerning requirements. Panels can reach a maximum height of 4.5 m thanks to a substructure and tie-rod system that can perfectly align and join them.

*Valorizzare con eleganza e ricercatezza ogni soluzione progettuale costituisce una consuetudine ricorrente nel meticoloso approccio di Studio Klass. Il nuovo sistema di boiserie e porte Arial si presenta come una modalità raffinata di vestire gli spazi con poesia, un'arte decorativa permeata da un'eleganza senza tempo. Il progetto è curato da Studio Klass, da sempre riconosciuto per l'impegno nel mantenere un dialogo costante tra design, arte e cultura contemporanea.*

*Questo completo sistema di boiserie e porte offre una personalizzazione totale degli spazi, rivolto agli ambienti dove una decorazione elevata e ponderata è apprezzata. L'intento chiaro di Arial è di comunicare la magnificenza e la bellezza del contesto circostante, ponendo sempre al primo posto il comfort e il benessere di chi vive l'esperienza Molteni&C. Rivestire le pareti oggi diventa sinonimo di atemporalità, armonia, sobrietà e lusso.*

*Ogni spazio interno desideroso di esprimere liberamente la propria vena decorativa dovrebbe aspirare a un'eleganza simile. La struttura portante, realizzata con profili leggeri e resistenti in alluminio nelle finiture Iris e Peltro, sostiene pannellature disponibili in essenza primaria di rovere nelle varietà Sunrise, caffè e nero. Arial si distingue altresì per le infinite finiture disponibili, tra cui il laccato in tutti i colori della palette e il tessile Blend della gamma Gliss Master. L'attenzione al dettaglio si estende allo zoccolo e alla mostrina superiore, offrendo tre diverse soluzioni per soddisfare le richieste più esigenti. Le pannellature possono raggiungere l'altezza massima di 4,5 m grazie a un sistema di sottostruttura e rompitratta in grado allinearle e congiungerle perfettamente.*

# Linear Solutions Soluzioni Lineari

At the core of Aerial lies the linear panel, offered in diverse sizes, extending up to a maximum dimension from 300 mm to 1200 mm. For rooms with heightened ceilings, an additional 1500 mm panel can be affixed, enabling coverage up to a maximum height of 4500 mm.

The pewter or iris cuspede serves to connect these panels, enhancing aesthetic appeal and facilitating coverage of expansive areas. The 40 mm and 20 mm thick over-door panel seamlessly blends aesthetics with functionality, providing the option to complete wall finishes by incorporating doors of varying heights.

To elevate the aesthetics further, aluminum skirting positioned at the base and trim at the ceiling are offered.

These elements serve to finish the ends of the boiserie and are available in three distinct options to meet diverse preferences. The skirting is especially recommended for fabric boiserie installations.

*Il sistema Aerial è composto principalmente da profili verticali per il fissaggio a muro e da pannelli di rivestimento, fissati ad essi, disponibili in diverse finiture e dimensioni. I pannelli di rivestimento possono essere realizzati in larghezza a misura per qualsiasi esigenza progettuale (dimensione dei pannelli compresa tra 300 e 1200 mm). L'altezza dei pannelli è 3000 mm, per coprire ambienti con altezza ancora maggiore è possibile giuntare un secondo pannello di H 1500 mm per raggiungere un'altezza massima di 4500 mm. La cuspede peltro o iris unisce i pannelli aggiungendo ricchezza estetica*

*e permette di coprire ampi spazi. Il pannello sopraporta sp 40 e sp 20 mm unisce estetica e funzionalità offrendo la possibilità di rifinire le pareti integrando porte di diversa altezza.*

*Ad ulteriore complemento estetico, lo zoccolo, posizionato alla base, e la mostrina, posizionata a soffitto. Entrambi sono realizzati in alluminio per rifinire con precisione gli estremi della boiserie e sono disponibili in tre diverse soluzioni per soddisfare le richieste più esigenti. Lo zoccolo è particolarmente consigliato nel caso della boiserie in tessuto.*

# Corner solutions

## Soluzioni angolari

The angular solutions offered by the Ariel boiserie provide total flexibility to adapt to the shape of any room, creating a customized fit for the spaces. They follow every positive and negative angle with precision, akin to tailoring a bespoke suit for the environment.

*Le soluzioni angolari della boiserie Ariel permettono di seguire con totale flessibilità la forma dell'ambiente e della casa creando un abito su misura per gli spazi e seguendo con precisione ogni angolo in positivo e negativo.*

# Technical information

## Informazioni tecniche

# Axonometric view

## Vista assonometrica

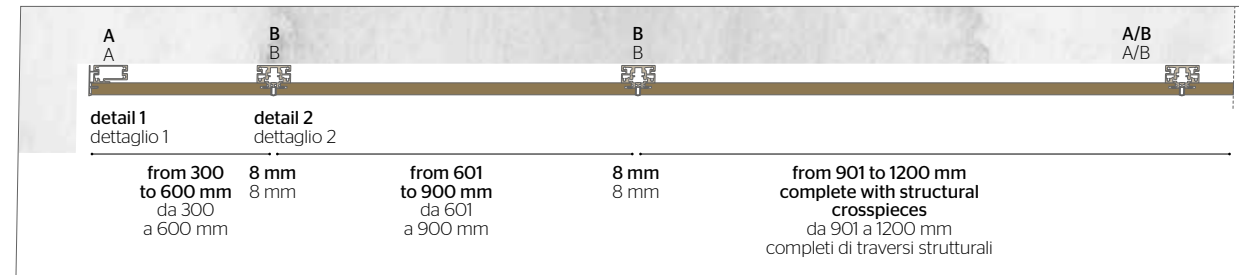

The Aerial system consists mainly of vertical profiles for wall attachment fitted with covering panels available in different finishes and sizes. Combining the different panels allows for the development of customised solutions up to a maximum height of 4500 mm. The covering panels can be customised in width for any design requirement (panel size between 300 and 1200 mm).

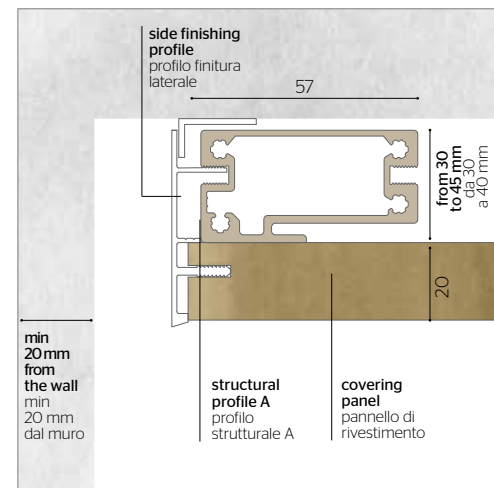

*Il sistema Aerial è composto principalmente da profili verticali per il fissaggio a muro e da pannelli di rivestimento, fissati ad essi, disponibili in diverse finiture e dimensioni. In altezza la combinazione dei diversi pannelli permette di sviluppare soluzioni su misura fino ad un'altezza massima di 4500 mm. I pannelli di rivestimento possono essere realizzati in larghezza a misura per qualsiasi esigenza progettuale (dimensione dei pannelli compresa tra 300 e 1200 mm).*

# Doors

Porte

# ARIAL DOORS

Studio Klass

Arial doors are designed to integrate seamlessly with the boiserie, maintaining its aesthetic finishes and flexibility.

*Le porte Arial sono studiate per integrarsi perfettamente alla boiserie e ne mantengono le finiture estetiche e la flessibilità.*

*Arial doors feature specially designed handles, hidden locks and a magnetic latch. Behind the elegance of the panels and profiles lies the essence of Molteni&C's know-how applied to Arial: three different types of hinges for the doors, for which the company holds patents for parts designed internally by the R&D team, and the complete electrification of the boiserie that will allow for a series of future developments, to always keep up with the evolution of the modern lifestyle.*

*Le porte Arial, battenti a filo e bifacciali e Pivot sono dotate di maniglie ad hoc, serrature nascoste e scrocco a calamita magnetico. Dietro l'eleganza dei pannelli e dei profili si celano le perle del know-how Molteni&C applicato ad Arial: tre diverse tipologie di cerniere per le porte, di cui l'azienda detiene brevetti per parti studiate internamente dal team R&D, e la completa elettrificazione della boiserie che permetterà una serie di sviluppi futuri, per rimanere sempre al passo con l'evoluzione dello stile di vita moderno.*

# Pivot doors

## Porte Pivot

The Pivot door with rebate seamlessly integrates with the boiserie, ensuring complete continuity while enabling wide compartment openings and elegant adaptation to larger spaces. This versatile element permits different finishes on its two sides, facilitating optimal blending with any environment. It can be complemented with either the Superquadro or the Supercerchio handle for added aesthetic appeal.

*La porta Pivot con battuta crea completa continuità con la boiserie, permette un'ampia apertura dei vani e si adatta con eleganza agli spazi più grandi. È un elemento versatile che permette di avere finiture differenti sui due lati, per sposarsi al meglio con ogni ambiente. Può essere completata sia con la maniglia Superquadro che con la maniglia Supercerchio.*

# Hinged doors

## Porte a battente

The hinged door seamlessly integrates with the wall boiserie system, ensuring a cohesive aesthetic. Available in both "push" and "pull" versions, it facilitates a clear passage of light between rooms. The aesthetics are further enhanced by the choice of Tectus hinges, known for their high load capacity, or by the Molteni side recessed hinges, renowned for their clean and minimalist lines.

*La porta battente si integra alla perfezione con il sistema di boiserie a parete. Disponibile sia in versione "a spingere" che "a tirare" permette un passaggio di luce netto tra gli ambienti. L'apertura della porta viene sempre indicata rispetto al lato complanare, ovvero il lato in cui la porta è allineata alla parete. L'estetica viene arricchita dalle cerniere Tectus, caratterizzate da un'elevata portanza, o dalle cerniere Molteni&C a incasso laterale, caratterizzate da linee pulite e minimali.*

# SINCRO DOORS

By UniFor design Studio Klass

The Sincro doors are at the pinnacle of mechanical precision and minimalist design.

*L'apice della prestazione meccanica si fonde con un design essenziale e rigoroso nelle porte Sincro.*

Designed to seamlessly integrate into contemporary living and working spaces, Sincro doors blur the lines between residential and professional environments. At the forefront of innovation, the Molteni Group presents Sincro sliding doors as a testament to its technical expertise and commitment to excellence. Crafted with precision-engineered aluminum profiles and transparent glass panels, Sincro doors offer a perfect balance of strength and subtlety. Available in sunrise oak and coffee oak finishes for the profiles, and pewter and

iris for the metal parts, Sincro harmonizes effortlessly with the materials used across the Molteni&C collections. The smooth and synchronized movement of the doors, facilitated by impeccable engineering, ensures stability, uniformity, and elegance in motion. With its understated aesthetic and flawless functionality, Sincro sliding doors elevate any space with a touch of modern sophistication.

*Nella Collezione 2024, il Gruppo Molteni esprime il proprio know-how e la maestria nel mondo tecnico attraverso la proposta delle porte scorrevoli Sincro. Il nome stesso suggerisce un'armonia precisa e silenziosa delle ante in movimento. Le ante Sincro si sovrappongono una all'altra durante il movimento di apertura e sono in completa sospensione, senza guide a terra. Questo ne aumenta la leggerezza e rende il movimento sincronico delle porte ancora più elegante. I binari che sostengono le porte nella parte superiore sono disponibili in due versioni: binario a soffitto con anta fissa*

*oppure binario ad incasso con anta fissa o vano a incasso. Alluminio impiallacciato e vetro sono i materiali protagonisti di questo sistema di ante scorrevoli, interpretando con eccellenza lo spirito di un prodotto che aspira a essere leggero e discreto. L'alluminio, quale metallo leggero e duttile per eccellenza, unito alla trasparenza del vetro proposto nell'unica versione cristallina, riserva la scena allo scorrimento in perfetta sincronia delle ante, reso possibile dall'impeccabile studio ingegneristico. Il movimento risultante è stabile, uniforme, delicato ed armonico.*

# SISTEMA 7 DOORS

Vincent Van Duysen

An authentic portals between two rooms that integrate into the surrounding furnishings, like real design tools that can configure the architectural space.

*Un portale di passaggio tra due ambienti che si integra con l'arredo circostante, diventando un vero strumento progettuale capace di configurare lo spazio architettonico.*

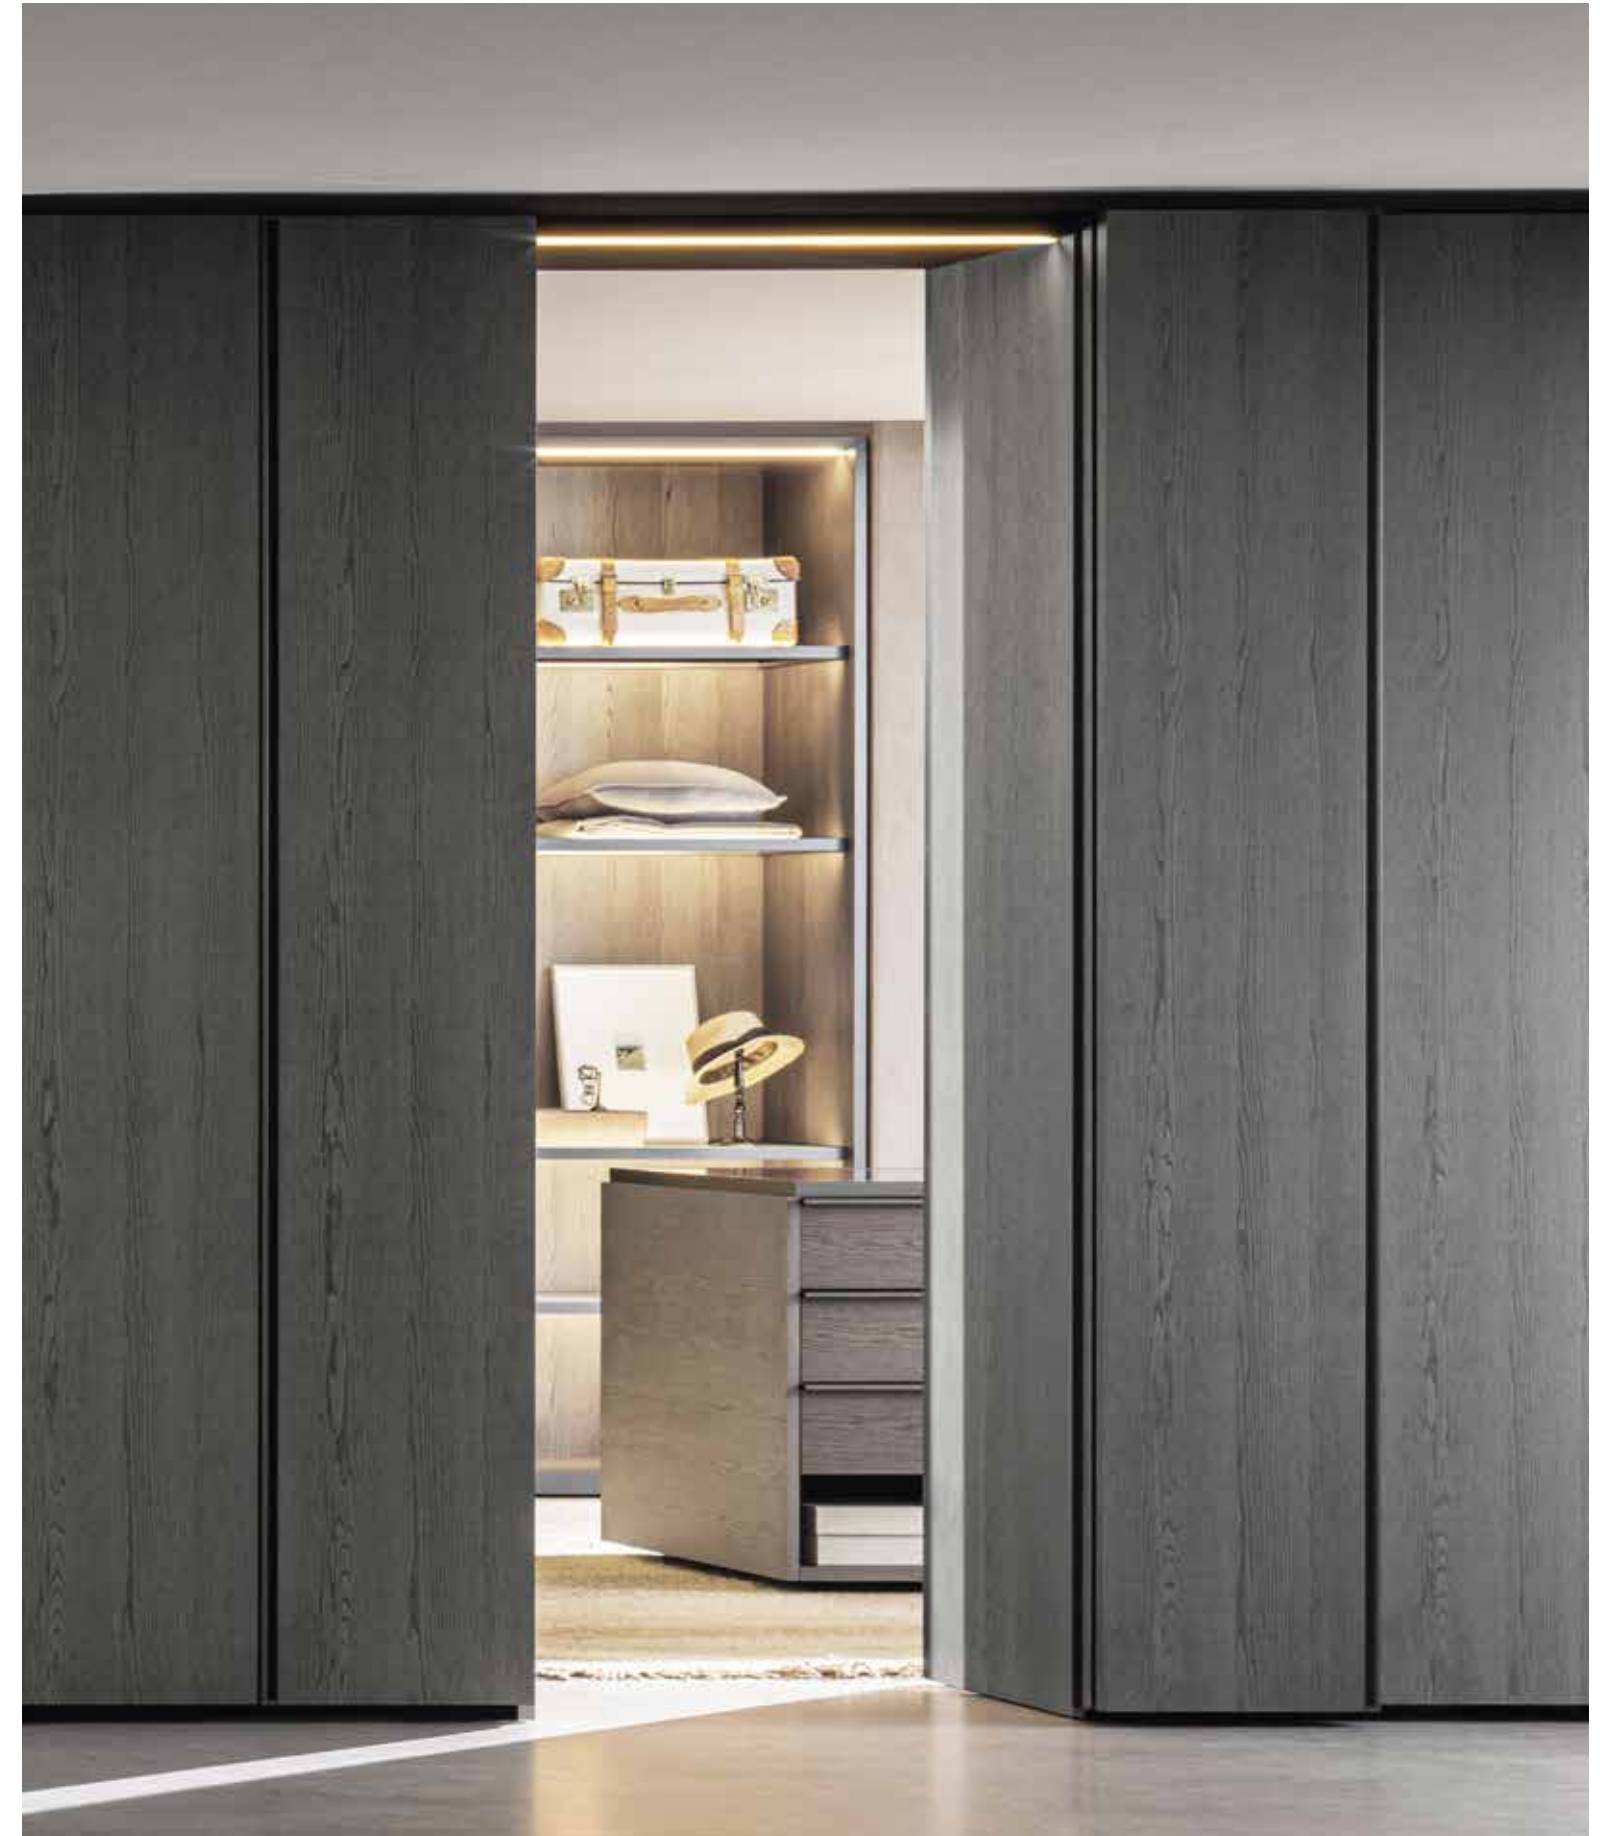

Sistema 7 offers innovative solutions to complex furnishing challenges by seamlessly integrating with existing walls, effectively transforming into a partition wall between two interconnected spaces. This system introduces inventive linear and angular configurations, marking a new era in hinged and folding door projects. Utilizing hinges with 90° and 180° opening capabilities, Sistema 7 operates without the need for tracks or trolleys. At the core of the Sistema 7 project lies a patented tilting mechanism with a

strong architectural essence. This mechanism enables effortless and silent movement of the doors from their initial position to the side of the opening, providing complete accessibility. Once opened and folded back upon themselves, the doors align parallel to the adjacent opening, without encroaching upon the surrounding space. Sistema 7 is meticulously designed to accommodate doors of varying materials, including thick lacquered, wooden, or glass doors with custom acid etching on the front surface.

*Sistema 7 risolve soluzioni arredative complesse, integrandosi alle pareti esistenti, trasformandosi in parete divisoria tra due ambienti comunicanti, creando innovative soluzioni lineari e angolari, è parte integrante di un progetto di nuova generazione per ante battenti ed ante pieghevoli dotati di cerniere con apertura a 90° e 180°, senza utilizzo di binari o carrelli. Il cuore del progetto di Sistema 7 è un meccanismo basculante brevettato dalla forte vocazione architettonica, che permette, senza sforzo e silenziosamente, di*

*traslare le ante dalla loro sede iniziale al lato del vano, con il risultato di renderlo totalmente accessibile. Le ante così aperte e ripiegate su sé stesse, si allineano parallelamente al vano adiacente non occupando l'area davanti al vano. Sistema 7 è predisposto per accogliere ante a forte spessore laccate, in essenza o in vetro con acidatura custom sulla facciata.*

*SISTEMA 7 - VINCENT VAN DUYSSEN*

Doors 90°/180° folding opening,  
graphite oak doors, pewter colour  
profile, silver cembran structure

Ante con apertura pieghevole 90°/180°.

# Technical information

## Informazioni tecniche

- 1 SIDE GLASS PANEL**  
The glass side enhances the design and aesthetic perception of a wardrobe used as a room divider.

**TERMINALE IN VETRO**

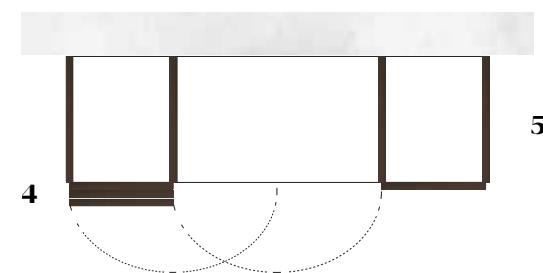

La spalla terminale in vetro alleggerisce e valorizza l'impatto estetico dell'armadio centro stanza.

**2 BOISERIE BACK PANEL**

The boiserie back panel turns the back into a veritable decorative wall, suitable for a range of contexts.

**SCHIENALE BOISERIE**

La boiserie sul retro dell'armadio trasforma lo schienale in parete decorativa integrandolo armonicamente in qualsiasi contesto.

- 4 180° OPENING**  
The wardrobe takes pride of place, not only aesthetically but also in terms of functionality. The 180° opening facilitates access to interior spaces while minimizing the overall bulk of the doors.

**APERTURA A 180°**

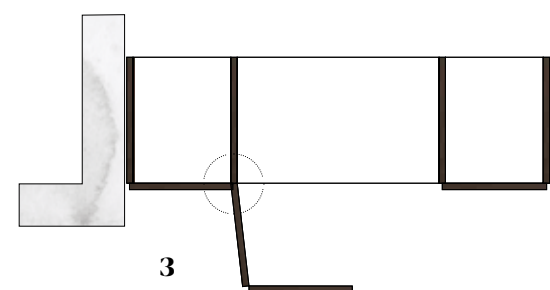

L'armadio diventa protagonista assoluto dello spazio, rispondendo ad altissimi livelli di funzionalità. L'apertura a 180° facilita l'accesso agli spazi e minimizza l'ingombro delle ante.

**5 DOUBLE DEPTH**

Sistema 7 comes in a variety of dimensions, starting from the two depths of 595 and 435. Everyone can enjoy a wardrobe tailored to his needs.

**DOPPIA PROFONDITÀ**

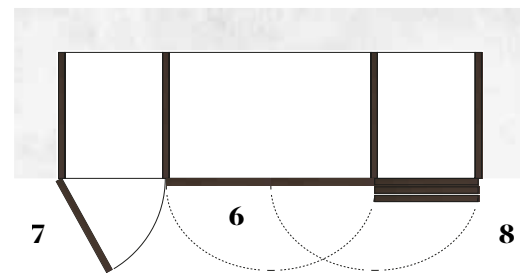

Sistema 7 si presenta in diverse varianti dimensionali, a partire dalla doppia profondità di serie: 595 e 435. A ciascuno il proprio armadio su misura, realizzato in base alle proprie esigenze.

- 3 HINGE FOR PASSAGEWAY COMPARTMENT**  
Folding doors are hooked onto the side of the wardrobe module, whether single or double.

**CERNIERA PER VANO PASSANTE**

Le ante pieghevoli sono agganciate al fianco esterno del modulo sia singolo che doppio.

- 6 FOLDING DOOR FOR COMPARTMENTS 790 AND 954 W**  
The door can be folded sideways thanks to a special patented hinge applied to the top of the door.

**ANTA PIEGHEVOLE PER VANI 790 E 954**

Una speciale cerniera brevettata, applicata alla parte superiore dell'anta consente di ripiegarla lateralmente.

**7 180° HINGED DOOR**

Single compartments, 380, 462 and 626 wide, can be closed with hinged doors fitted with a special 180° opening hinge.

**ANTA A BATTENTE A 180°**

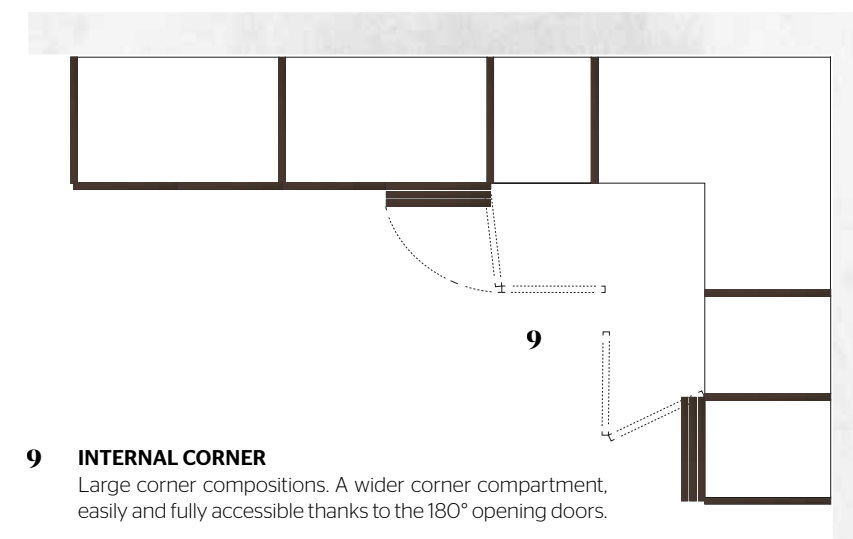

Anta a battente per vano singolo nelle misure 380, 462 e 626, dotata di speciali cerniere con apertura a 180°.

**8 FINISHINGS**

Wide range of materials and finish options: from the lacquered doors to the wood finishes up to the exclusive net glass.

**FINITURE**

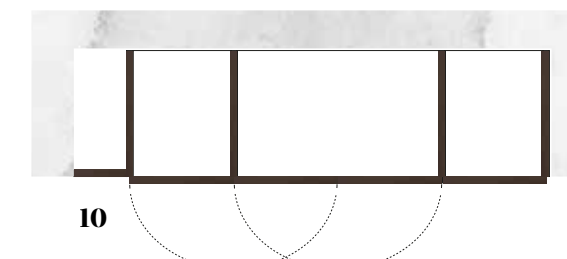

Libero accostamento dei materiali e finiture: dall'anta laccata alla versione in essenza fino ad un'esclusiva anta vetro net.

- 9 INTERNAL CORNER**  
Large corner compositions. A wider corner compartment, easily and fully accessible thanks to the 180° opening doors.

**ANGOLO INTERNO**

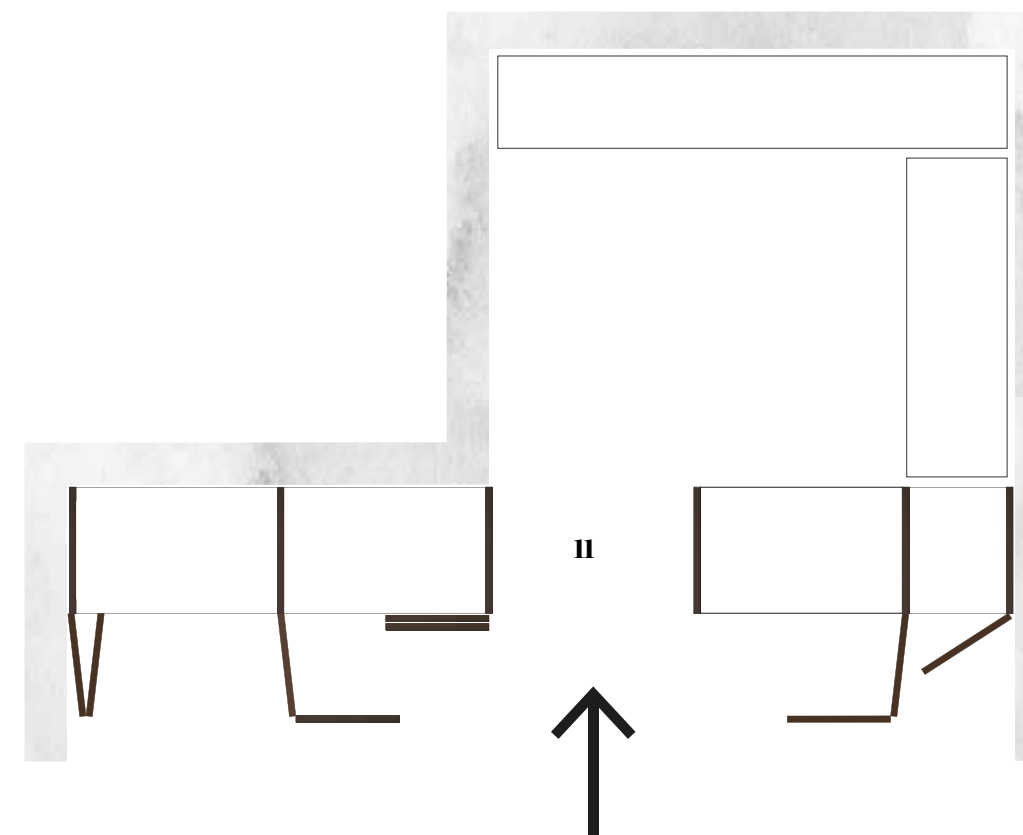

Composizioni angolari di grandi dimensioni. L'angolo interno viene sfruttato con un vano di più ampie dimensioni che, grazie all'apertura delle ante a 180°, diventa facilmente accessibile e fruibile.

- 10 CUSTOMIZED COMPARTMENT**  
To achieve the best fitting modularity, the wardrobe can be fitted with customized side fillers.

**VANO A MISURA**

Per raggiungere la sua dimensione ottimale, l'armadio si avvale di fasce di tamponamento a misura.

- 11 PASSAGEWAY TO THE WALK-IN CLOSET**  
A walk-in wardrobe that opens onto different areas: the wardrobe separates and joins two different rooms creating a magic passageway. The entrance, closed by two 180° opening doors, leads into the walk-in closet area.

**VANO PORTA PER CABINA ARMADIO**

L'armadiatura separa, e al contempo congiunge, due ambienti distinti creando un magico portale d'accesso. La porta d'accesso, composta da due ante ripiegabili a 180°, consente il passaggio dalla stanza alla cabina armadio.

- Gliss Master Sistema 7 is a versatile wardrobe system specifically designed to harmonize and blend in any domestic environment, combining its primary 'storage' function with an authentic architectural vision.
- Gliss Master Sistema 7 is the perfect solution for complex furnishing and storage needs. It blends in the existing walls and converts into an architectural room divider, generating spaces, separating rooms and creating innovative linear and corner solutions.
- The Gliss Master Sistema 7 system is part of the latest generation door system for hinged and folding doors, opening with 90° and 180° hinges, eliminating the need for sliding tracks.

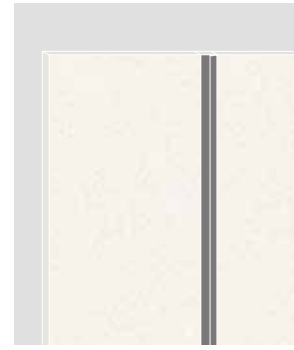

- Gliss Master Sistema 7 è un sistema di armadi concepito per integrarsi ed armonizzarsi perfettamente in tutti gli ambienti domestici, affiancando alla sua primaria funzione di contenimento un'autentica vocazione architettonica.
- Gliss Master Sistema 7 risolve soluzioni arredative complesse, integrandosi alle pareti esistenti, trasformandosi in parete divisoria tra due ambienti comunicanti, creando innovative soluzioni lineari ed angolari.
- Gliss Master Sistema 7 costituisce parte integrante di un progetto di nuova generazione per ante battenti ed ante pieghevoli dotate di cerniere con apertura a 90° e 180°, senza utilizzo di binari e carrelli.
