Molteni&C

GLISS MASTER —
VINCENT VAN DUYSEN 2015

Gliss Master develops the concept of storage and space organisation. This approach permits maximum uniqueness and customisation. It is a tailor-made design for a wide range of doors, accessories and finishes, which creates systems adapted to individual needs. The Gliss Master range can be combined with accessories and different finishes, drawing on the components of each series to create exclusive solutions. The 2023 collection includes two new doors - Linear by Vincent Van Duysen and Blend by Rodolfo Dordoni, and a new set of accessories and interior customisations. It is a system that reflects the importance of a tailor-made approach for Molteni&C.

TECHNICAL INFORMATION

STRUCTURE

BASE
Chipboard panel covered in melamine facing with adjustable feet for free-standing support.

LID, CENTRAL PANEL AND BACK
Chipboard panel covered in melamine facing. Central panels have adjustable feet for free-standing support.

FINE GRAIN BACK PANEL
Chipboard panel covered in co-extruded ABS-PMMA cylinder-etched sheet, painted in a specific Molteni finish.

WOOD BACK PANEL
Chipboard panel covered in wood veneer in Oak (Quercus) or Eucalyptus (Eucalyptus globulus).

BACK, LID, SIDE AND CENTRAL PANELS (GLASS)
Perimeter frame in painted extruded aluminium with 4 mm thick tempered glass. Available in different finishes.

SIDE PANEL (MELAMINE-FACED)
Chipboard panel covered in melamine facing. Adjustable feet for free-standing support.

SIDE PANEL (MATT LACQUERED COLOURS OR GLOSSY COLOURS)
Chipboard panel covered in melamine facing. Exterior painted in the "Molteni Range" colours. Adjustable feet for free-standing support.

SIDE PANEL (WOOD)
Chipboard panel covered in melamine facing on the inside, and Oak (Quercus) or Eucalyptus wood (Eucalyptus Globulus) veneer on the outside.
Adjustable feet for free-standing support.

CENTRAL PANEL FRAME
Perimeter frame in painted extruded aluminium.

COVER PROFILES AND RUNNERS
Extruded aluminium covered in melamine paper or painted, with dust protection profiles.

SIDE PANEL EXTENSION PROFILES
Anodised extruded aluminium, painted in the "Molteni Range" colours or covered in Oak or Eucalyptus wood veneer.

DOORS

MELAMINE (QUICK - START - "A FILO" - HOLLOW - BLADE - GRIP)
Chipboard panel covered in melamine facing. Soft-close hinges and slide system. Handles in different materials and finishes.

MATT LACQUERED COLOURS, GLOSSY COLOURS OR GLAZE (FIND-ME - START - "A FILO" - HOLLOW - BLADE - GRIP - NICHE - BLEND - LINEAR - SISTEMA 7 WOOD)
Chipboard panel covered in wood veneer or melamine facing, painted in the "Molteni Range" colours. Soft-close hinges and slide system. Handles in different materials and finishes. For the BLEND model, the panel is profiled with painted extruded aluminium.

WOOD (FIND-ME - START - "A FILO" - HOLLOW - BLADE - GRIP - NICHE - SISTEMA 7)
Chipboard panel covered in Oak or Eucalyptus wood veneer. Handles in different materials and finishes.

HINGED GLASS DOOR ("A FILO")
Chipboard panel covered in melamine facing, with mirror or 4 mm thick glass applied, painted in the "Molteni Range" colours.
Perimeter profile in anodised extruded aluminium. Soft-close hinges.

SLIDING GLASS DOOR ("A FILO")
Frame in anodised extruded aluminium with mirror or 4 mm thick glass applied, painted in the "Molteni Range" colours. Soft slide system.

GLASS FLUSH SLIDING DOOR ("A FILO")
Frame in anodised extruded aluminium with mirror or 4 mm thick glass applied, painted in the "Molteni Range" colours. Soft slide system.

GLASS / SISTEMA 7 GLASS DOORS
Extruded aluminium frame with 4 mm thick glass, available in various finishes. Hinges with 180° opening, for swing doors. Patented folding mechanism for SISTEMA 7.

LINEAR GLASS DOORS
Extruded aluminium frame with 4 mm thick glass, available in various finishes. Hinges with 94° opening.

SMOOTH DOORS
Chipboard panel covered in melamine facing. Interior and exterior Eco Skin finish.

SISTEMA 7 WOOD DOOR
Honeycomb panel painted in the "Molteni Range" colours or covered in Oak or Eucalyptus wood veneer.
Handle in painted extruded aluminium.
Hinges with 180° opening for swing doors.
Patented folding mechanism.

BAMBOO DOORS
Chipboard panel covered in melamine facing.
External finish, doors quilted externally in Eco Skin.
Perimeter profiles in painted extruded aluminium.

BLEND - SMOOTH FABRIC DOORS
Chipboard panel covered in melamine facing.
Interior and exterior fabric finish.

Dimensions in millimeters and inches. The right to discontinue and make changes is reserved. This information is based on the latest product information available at the time of printing.

TECHNICAL INFORMATION

INTERNAL ACCESSORIES

REMOVABLE SHIRT RACK BLOCK
Painted parts in phenolic veneer panel. Front tray made from chipboard panel covered in melamine facing. Bottom covered in eco leather.

DRAWER UNIT STRUCTURE FOR FRAME PANELS
Chipboard panel with melamine facing, painted in a specific Molteni finish.

INTERNAL SHELVES, DRAWER OR TRAY FRONT, MOVABLE TRAY BLOCK AND JUMPER AND SWEATER AND SHIRT RACK
Chipboard panel covered in melamine facing.

INTERNAL SHELVES WITH FRONT PROFILE
Chipboard panel covered in melamine facing, front profile in painted extruded aluminium.

INTERNAL SHELVES AND ISLAND TOPS IN ECO SKIN
Chipboard panel covered in melamine facing, front profile in painted extruded aluminium and upper cover in eco leather.

WOOD SHELVES
Chipboard panel covered in wood veneer in Oak (Quercus) or Eucalyptus (Eucalyptus globulus).

CLOTHES ROD
Tube in anodised aluminium. Rod support bracket in chromed plastic or Eco Skin version.

GLASS FRONT, GLASS SHELVES AND ISLAND TOP
Extruded or painted aluminium. Tempered glass th. 4 mm.

FINE GRAIN FRONT
Chipboard panel covered in co-extruded ABS-PMMA cylinder-etched sheet, painted in a specific Molteni finish. Perimeter profile in painted extruded aluminium.

WOOD FRONTS
Chipboard panel covered in wood veneer in Oak (Quercus) or Eucalyptus (Eucalyptus globulus).

INTERNAL DRAWER SIDES, TRAY, DRAWER DIVIDERS, AND LINEN TRAY
Chipboard panel covered in melamine facing.

INTERNAL DRAWER BOTTOM AND TRAY
Chipboard panel covered in melamine facing.

SHOE SHELF PROFILES AND TROUSER BARS
In anodised or painted extruded aluminium.

PULL-OUT MIRROR
Metal frame with 4 mm thick mirror.

HANDLES AND VARIOUS ACCESSORIES
Made with different materials and finishes.
WOOD BASE, TOP AND SHELVES (ISLAND WITH GLASS DOORS)
Chipboard panel covered in Oak or Eucalyptus wood veneer.

IONIZER
See technical data sheet enclosed with the product.

MODULARITY

Modularity - Structure

The widths 492 - 656 - 820 - 984 - 1312 - 464 (term. element) mm (19 3/8" - 25 7/8" - 32 1/4" - 38 3/4" - 51 5/8" - 18 1/4") include the left side panel. The total width of the composition will include the final panel of th. 30 mm (1 1/8").

Heights:
tot. H 2343 (92 1/4"), door 2313 (91"), int.2253 (87 3/4"), sliding or flush sl. door inter. 2163 (85 1/8")
tot. H 2439 (96"), door 2409 (94 7/8"), int. 2349 (92 1/2"), sliding or flush sl. door inter. 2259 (88 7/8")
tot. H 2631 (103 5/8"), door 2601 (102 3/8"), int. 2541 (100"), sliding or flush sl. door inter. 2451 (96 1/2")

tot. H 2919 (114 7/8"), door 2889 (113 3/8"), interior 2829 (111 3/8"), only hinged

Assembly instructions

For the assembling of a sliding and a flush sliding door wardrobe a minimum space of 6 cm (2 3/8") is required considering the minimum height of the compartment.

Assembly of the corner element (for wardrobe with doors) requires a minimum extra height of 6 cm (2 3/8").

Assembly of a wardrobe in an alcove requires a minimum extra side space of 4 cm (1 5/8"). This space can be reduced to 15 mm by using special hardware provided on request for the side compartment. Surcharge per compartment.
This hardware may only be applied if there are open compartments, hinged doors (excluding SISTEMA 7) and wooden side panels.

Assembly of a hinged wardrobe requires a minimum height clearance of 1.5 cm, which varies with:
- SISTEMA 7 hinged doors ⟶ 5 cm
- LED lighting with 'Smart' vertical bars ⟶ 3.5 cm
- LED lighting with horizontal bars ⟶ 2.5 cm
The minimum height drops to 1.5 cm if the compartment housing the lighting components, is fitted with inspection on top cod. **PAISPC01** (see price list page 33).

DOORS

155° opening (only for compartments with wooden sides)

On FIND-ME - QUICK - START - "A FILO" - BAMBOO - HOLLOW - GRIP - NICHE - BLEND doors it is also possible to use 155° opening hinges, with an extra charge per individual door. In this case, it is necessary to take special care in inserting internal drawer units, trinket trays and devices.

155° hinges cannot be used on 'A FILO doors (mirror and glass) with width over W 487.

It is also necessary to comply with the diagrams provided here.

Molteni&C

NO START - GRIP doors

YES FIND-ME - QUICK - "A FILO" - BAMBOO - HOLLOW - NICHE doors

YES START - GRIP doors

NO BLEND doors with GLASS doors
Hinged doors with key lock

For the hinged doors specified, a key lock can be fitted to order. The additional cost for one or two doors. It can even be fitted on a terminal element or a corner element (in compliance with the handle installation rules).
For doors with a lock, the internal drawer units must be suspended.
Installation of only the lock can be requested, without a handle, always considering the price of the START doors and the additional cost of the lock.
For LINEAR doors, see page 102 price list because they have special locks.

SISTEMA 7

A new folding opening system with a patented mechanism which makes it possible, in the 180° version, to open the unit entirely.
The mechanism, light and silent, does not require tracks and therefore allows use of the full height.

The hinged doors enable 180° opening and wardrobe width made to order; the special hinge pins are anchored to the base and the cover.
Anyhow, SISTEMA 7 hinge doors can be used (see p. 14/15 price list).

The 90° opening, on the other hand, is an intermediate solution that can solve design problems while maintaining a uniform design.

The thickness of the wood and glass door are 35 mm.

SISTEMA 7 can be applied to all Gliss Master structures with wood, glass or frame sides, but cannot be used with other Gliss Master doors.
The 90° and 180° folding door is applied to modules with width 790 and 954, while the hinged door is applied to single modules 380/462/626, double modules 790/954/1282 and the corner unit (see pag. 16 price list).
The 380 mm unit is specific for SISTEMA 7 with hinged door.

Reductions
90° and 180° folding openings can be reduced in height only.
180° hinged openings can be reduced in height and in width up to 405 mm.

Notes
The side panels follow the same logic as Gliss Master (see drawing ●).

Molteni&C

★ **= 180° Hinged** (necessary for 180° opening and for wardrobes
with width made to order)

CORNER ELEMENT

Open corner element P 595

The open corner element is supplied complete with base, top and backs.
The melamine-faced, frame or glass central partitions must be inserted between the corner element and the adjacent modules.
The open corner element can also receive a side panel to close the composition.

Doors can be applied to the open corner element by following the rules below:
- GLASS door (180°) on corner element 1282x1282 / 1101x1101 with all types of side panels (wood, frame or glass);
- SISTEMA 7 door (180° hinged and 180° folding) only on corner element 1101x1101 with all types of side panels;
- QUICK and "A FILO" door (155°) only on corner element 1101x1101 with wooden side panels.
- LINEAR door only on corner element 1101x1101 with wooden side panels.
Compartments adjacent to the corner element can be either open or closed with the same door model.

Notes

The shelf is not included in the price of the corner element.
LED lighting bars can be applied to the shelves and lids, as shown in the drawing below.
Not possible with glass back panels.

Reductions

The corner element can be reduced in height, width and depth.
Width reduction can only be performed on one side or on both sides up to a minimum width of 1101 mm.
See method onprice list page 32

Depth reduction can be performed on either one or two sides up to a minimum depth of 435 mm. If only one side is reduced, it will be the one with the longer shelves (*).

STRUCTURE

Structure for walk-in closet

In version **A**, the structure (base, cover, centre and side panels) has melamine facing in the same finish as the structure.
The back panel can be made in the finishes on the price list (see price list page 8).
The side panels are always provided without extension profile (see detail).
In version **B**, the central partitions and sides are made with an aluminium frame with pewter colour, bronze or iris finish, with or without glass.
Base, lid and back piece are in melamine, in the same finish as the structure.
The back panel can be made in the finishes on the price list (see price list page 8).
Horizontal tags on the base and lid are made in a pewter colour, bronze or iris finish like the side frames.
In version **C**, given the presence of frame sides in pewter colour finish, the central and side partitions in melamine are also made with from tags in pewter colour, bronze or iris, considering the specific price.

Reductions
See procedures on price list page 32.

✶ ✶ Notes
The central melamine sides with front profile, frame and glass are available with an Eco Skin insert, only for use in walk-in closets

✶   Glass back panel (H max 2631) not available in the linear compartment W 1282 and in the corner element

Molteni&C

version **A** - Structure with wooden sides (melamine in the same colour as the structure)
Glass back panel max H 2631

* Excluding module with glass back

In this solution the horizontal tags are always made in the same finish as the structure

central partition   side panel

version **B** - Structure with frame or glass sides (glass back panel max H 2631)

The side panel is always glass

In this solution, the horizontal tags are made in pewter colour, bronze or iris finish, like the sides with frame or glass

Compartments with frame or glass sides must always include a shelf or a drawer unit

* Excluding module with glass back

✶ ✶   Available with an Eco Skin insert (for walk-in closets only)

Eco Skin   Eco Skin

version **C** - Structure with mixed sides (glass back panel max H 2631)

In this solution, the horizontal tags are made in pewter colour bronze or iris finish, like the sides with frame or glass. Melamine central partitions and sides are made with front tag in pewter colour, bronze or iris

pewter colour/ bronze/ iris   **det. A**

STRUCTURE

Linear modules

Linear modules are made up of a base and lid always made in melamine in the same finish as the structure.
The back is available in the three versions indicated below.
A1 and **A2** can be reduced in height, width and depth if closed by sides and doors that are compatible with the requested reductions.
A3 can be reduced only in height.

Central partitions

These are available in melamine, in the same finishes as the structure, frame and glass.
The melamine version can be reduced in height and depth.
The frame and glass versions can be reduced only in height.
Compartments with frame or glass sides must always include a shelf or a drawer unit.
A version with an Eco Skin insert is available for use in walk-in closets.

Side panels

These are available in melamine, in the same finishes as the structure, frame and glass.
The melamine version can be reduced in height and depth.
The side exterior is available also in matt lacquer, glossy lacquer or wood finish (vertical grain), as shown on p. 8 price list.
The standard finish on side panels is an extension profile in the coloured matt lacquer, pewter colour, bronze, iris (to be specified in the Order). The extension profiles for glossy lacquer or wood side panels always match the side panels of the same finish.
The frame and glass versions can be reduced only in height.
Compartments with frame or glass sides must always include a shelf or a drawer unit.

Reductions

* This compartment can be closed with a QUICK, "A FILO" and NICHE door (vertical and horizontal).
For glass backs, drawer units are mandatory for compartments with frame or glass sides.
For melamine structure, piqué, matt lacquered colours, wood or fine grain backs, use drawer units
that are narrower than the module.

Dimensions in millimeters and inches. The right to discontinue and make changes is reserved. This information is based on
the latest product information available at the time of printing.

EXTERNAL CORNER UNIT

External corner unit

- It can be either open or fitted with doors.
- It is always secured to the melamne central partitions of the adjacent wardrobes.
- The front profile can have a matt lacquered, pewter colour, bronze and iris finish.
- Height, width and depth can be reduced.
- The external corner unit can be closed in all hinged door models.

Reductions
The external corner unit can be reduced in height, width and depth.

* For this side, please consider the wooden central partition surcharge.

ceiling

320

Only on hinged door compartment

Costs to consider:
- Back cut
- Lid cut
- Fixed shelf with surcharge for cut
  (see page 133 price list for solid wood shelves)
- Back, fixed price (for all finishes)
Not possible with BLEND fabric back panel.

max. 461

min. 339

Costs to consider:
- Back cut
- Base/lid/shelf in solid wood
  2 cuts per shaped piece
- 2 additional panels (melamine structure)
- Possible cut in side

Notes
- Shaping in both height and width cannot be done on the same compartment.
- Confirmation to the customer of the feasibility of shaping will only be given after checking with the Molteni&C Technical Office.

Custom cuts for attics

Doors with slanting cut (only for wardrobes with solid wood sides)
When preparing the order, indicate heights H1 and H2, as well as the width L, as shown in the example.
The price for the slanting cut for each door is the same as cutting for a hinged door, as shown in the doors pages.
In this case a single module must be used with a QUICK, START, "A FILO", HOLLOW and GRIP hinged door, with the melamine facade and matt lacquered finishes, hinged on the higher side.
The structures can be standard or made to size.
Standard or made to size doors (only for wardrobes with solid wood sides)
Double compartments with hinged doors can be used for this solution.

FIND-ME door th 25

Door with full height vertical finger recess included in the door thickness.
The door is available in a hinged version in wood.

All the hinged doors have cushion-closing hinges.
Hinges with 155° opening can be used and a key lock can be installed on hinged doors.

The FIND-ME door can be made with LINEAR invisible hinges for matt lacquered colours, 3D matt lacquer, lunar, and wood finishes with a cost supplement per door.

Reductions

FIND-ME doors can be reduced as shown on p. 32 price list.

Notes

With 3D lacquer, glaze, and lunar surfaces, the outside of the side panel can be made with a matt lacquer finish or a laminate faced finish like the internal structure.

To match the glaze finish door, we advise the side exterior finish in dolomite grey matt lacquer with finger recess and extension profiles in pewter colour, bronze or iris.

To match the lunar finish door, we advise the side exterior finish in clay matt lacquer with finger recess and extension profiles in pewter colour, bronze, iris.

Technical information
- The hinged doors cannot be applied to frame or glass sides and to open corner units
  (1101x1101 - 1282x1282).
- The compartment above the drawer must always be closed with BLEND doors and
  cannot be equipped with central dividing sides.
- The protruding base, with one or more modules, must always be hooked to at least
  one side panel of the wardrobe.
- The decorative profile cannot be made on doors smaller than 487 mm wide.
- The drawer cannot be adjacent to the corner element (658x658).

Dimensions in millimeters and inches. The right to discontinue and make changes is reserved. This information is based on the latest product information available at the time of printing.
Molteni&C

BLEND door and external drawer design Rodolfo Dordoni

All hinged doors are equipped with soft closing hinges.
**It is possible to use hinges with 155° opening on hinged doors.**

Notes
In pairs of hinged doors, the handle is fitted on both doors.
The door covering fabrics are specific for this use and feature a
water-repellent surface treatment (Scotchgard).

Dimensions in millimeters and inches. The right to discontinue and make changes is reserved. This information is based on
the latest product information available at the time of printing.

GLASS door th 35 design Vincent Van Duysen

Glass door with 180° opening made with a special soft close hinge inserted in the profile and completely hidden in the side (exclusively by Molteni).
A full height handle is designed in the profile.

Integrated lock with coded key
GLASS hinged doors with integrated lock are available, taking into account a surcharge for single door or pair of doors.
As standard, all lockable doors in a wardrobe will have different coded keys.
On the pair of doors, the lock will always be applied to the right door.
The lock is not applicable to hinged doors of the external corner units.

Reductions
GLASS doors can be reduced as shown on p. 32 price list.

Notes
The GLASS doors are available with H 2889 only for widths 487, 815, 979 and for the corner unit 1101x1101.
In the pair of hinged doors, the handle is mounted on both doors in the pair.

The GLASS door can also be installed on the open corner module.

MERIDIAN door th 42 design Studio Klass

Hinged door with 180° opening fitted as standard with patented soft open/close hinges.
Door pauses at 110° with non-simultaneous closure of the pair.
MERIDIAN doors are available in three versions:
- Glass or MDi by Inalco door with external metal profiles
- Glass or MDi by Inalco door with external wood profiles
- Glass door with decorative and external wood profiles

For pairs of hinged doors W 815, 979 and 1307 the handle is fitted on both doors.

Reductions
MERIDIAN doors can be reduced in height and in width up to 405 mm.

Notes
Locks cannot be applied to MERIDIAN doors.
When the MERIDIAN door is used on a linear structure less than 495 mm deep or on an open corner structure with reduced depth, the patented soft close hinge cannot be used.
The door will be fitted with SYSTEM 7 type slow close hinge.
Doors in MDi by Inalco are not available in 2889 height.

Molteni&C

LINEAR door th 25 design Vincent Van Duysen

All the doors applied to the linear modules are equipped with new generation concealed hinges on the side panel, with soft closure.
For use on the 1101x1101 corner element, the glass doors are equipped with pivot hinges (SISTEMA 7), while the wooden doors with traditional 155° hinges.

A handle with lock is available considering a surcharge for single door or a pair (for wood and glass doors).
The lock is not available for corners 1101x1101.

Reductions
The LINEAR doors can be reduced to the millimetre in height and width.

Notes
LINEAR doors cannot be applied to frame or glass sides.
H 2889 hinged doors are available only in W 405/487.

To match the lunar finish, we advise the side exterior finish in matt lacquered argilla and the extension profiles in the same finish as the handle.

SPECIAL ELEMENTS

Column with open compartment

- Can be inserted only in wardrobes without doors or with hinged doors.
- Central partitions and/or lateral pieces close the column and cannot be frame or glass.
- The open compartment is always in matt lacquered colours.
- Doors are always without handles because they protrude with respect to the structure.
- Drawers are fitted with the "E" handle of the START door.
- Front finish: melamine front, matt lacquered colours, glossy lacquered colours and wood.

* **The price does not include the central partitions or side panels, nor the internal shelves.**

Reductions are allowed only in height, and costs of cutting the structure and doors are applied. Open compartment and lower part cannot be reduced.

Wire passage **EPA1** Ø 60 chrome on request on back.

Notes
The back of the open compartment cannot hold a mounted TV.

FILLERS AND OPENING SIDE TRIMS

Horizontal filler
The filler is supplied in two parts, one part to be fixed to the ceiling to which the other will be hooked on (see diagram below).
The distance of the filler from the door is the client's decision.
In the cartapaglia finish, the grain direction is always vertical.
In the wood, lunar, glaze, 3D lacquer finish, the grain is always horizontal.

Opening fillers
Can be made with START and "A FILO" door. For handles, consider surcharge.
Always have the 155° hinges.
Are the same height as the other doors in the composition.
Have a closing strip on their lower part.
In the wood finish, the grain direction is always vertical.

Vertical filler
The vertical filler can be placed flush with the structure or the door.
This detail must be specified in the order to prepare the side panel (see example).
If this detail is not specified when placing the order, the filler will automatically be placed flush with the structure and the side panel will have the extension profile.

LIGHTING SYSTEM

Lighting bars with front LEDs
Internal compartments of Gliss Master wardrobes can be equipped with front LED lighting. The lighting bar can be applied to lids or to wooden, transparent glass and Eco Skin shelves, wood and glass shoe rack shelves. Using the electrified wire strip installed on the side (wood, frame or glass), the shelf can be moved. For each compartment length, we have make specific lighting bars with wiring compliant with European safety standards.
A wire strip is not needed if the compartment only has lighting on the top piece.
Lighting bars can be reduced with a surcharge for the shelf cutting.

Horizontal and vertical LEDs cannot be used for the same composition.

Notes
When placing the order, the customer must indicate how many shelves with lighting bars are required.
For assembly: a lighting system on wardrobe with hinged doors requires a minimum extra height of 2,5 cm (1").
The height can be reduced to 15 mm by inspection on top cod. PAISPC01 (see page 33 price list).
Individual wire strip is always installed on the left side panel of the compartment, with the exception of corner units for walk-in wardrobes and of the compartment next to the corner unit.
When ordering, indicate compartments with wire strip.
The electrified wire strip is mandatory for wardrobes with wooden sides and glass back.

INTERNAL ACCESSORIES

Aircub is an air purifier and aroma diffuser that eliminates up to 95% of the harmful agents inside wardrobes through a process of ionisation and ozonation. Aircub can be managed easily from your smartphone with a dedicated app. Aircub can be installed on the back panel of each compartment. Just plug it into the electrical socket and turn it on. Every Aircub has a single plug.
Up to 3 Aircubs per wardrobe can be installed using the specific multi-socket connector.
Information about Aircub is available on the website https://www.puricraft.com/

SOFT LINE INTERNAL FITTINGS

▶ The SOFT LINE equipment can be used in units with frame, glass and wooden side
  panels and with all types of backs.
▶ In case of application on the glass/frame side panels, the special metal profiles
  PST/PSV must be used. These are not included in the price of the trays.
▶ The pull-out frames of the SOFT LINE equipment cannot be combined with modular
  drawer units.
▶ **No reductions of any kind are possible.**

Notes
The SOFT LINE equipment should not be used:
- in corner units
- in units close to corner elements in wardrobes with doors
- in units closed by overlapping sliding doors.

CAVE handle

Internal fittings - modular drawers and trays

Notes
The parts of this internal fittings are produced with width and height dimensions corresponding to the modular compartments. This makes it possible to organise the internal spaces in a number of ways. To correctly and quickly determine the internal fittings, some of the possible compositions arein the following pages.
When ordering, specify the handle finish as pewter colour, bronze or iris.

For the CAVE handle covered in Eco Skin, add a supplementary charge each

No reductions of any kind can be made on drawers, trays and pairs of side panels.

The pairs of side panels p. 153 price list or structures p. 154 price list are necessary for inserting all the elements. Compositions must be completed with an upper shelf (p. 133 price list) or glass cover p. 139 price list.

Warnings on using compartments adjacent to the corner element
It is impossible to use trouser or trinket trays (used individually).

ISLAND DRAWER UNIT

Two versions are available: with or without trinket trays in dolomite lacquer.
Shelves in Eco Skin are available in colours in the catalogue. Standard handles are mounted in pewter colour, bronze or iris finish.
For the CAVE handle covered in Eco Skin, add a supplementary charge each.

version with trinket trays
- Side A has 6 drawers H 190 and 2 extractable trinket tray blocks.
- Side B has 4 drawers H 190 and and lower open compartments.

version without trinket trays
- Side A has 6 drawers H 190 and upper open compartment.
- Side B has 4 drawers H 190 and and lower open compartments.

Dimensions of the island cannot be reduced, and the compositon cannot be modified.

Only for HOLD handle
It is possible to substitute the melamine drawers with glass drawers by adding the difference in price from **CLN8/19** and **CVN8/19**.
The melamine faced drawers can be replaced with drawers in other finishes using the price difference of code **CLN8/19** finishes.
