PÉNÉLOPE — CHRISTOPHE DELCOURT 2025

1—
3

The base of the Pénélope console features two opposing, curved structures with plastic and harmonious shapes that interlock, creating a sculptural effect reminiscent of the design of the Lise table. Made of rigid polyurethane, the shapes of the base can be finished with a high-gloss lacquered finish or covered with a sheet of polished steel. Above, a skillfully joined polymorphic top is available in marble with a glossy steel edge or in wood with a glossy lacquered edge. The edge finish is echoed in the base, creating a material continuity that gives the console a bold aesthetic with a strong visual presence.
