AVA TABLE — FOSTER + PARTNERS 2019

1—
3

Foster + Partners and Molteni have had a long and fruitful relationship that began with the design of the Still sofa in 2006. The practice also designed a range of office furniture called 'Elements' for UniFor, Molteni's sister company. Ava follows a natural progression from the earlier design of the UniFor Elements metal conference table to create a timber dining table.

The new design explores the warmth and tactility of timber and economy of material to create a sustainable piece of modular furniture that is suited to both domestic and commercial settings.
