## CARD — MICHAEL ANASTASSIADES 2024

1—  
3

Michael Anastassiades' versatile talents bring a distinctive touch to the design process of the Card bookcase, adding significant value to its creation. Characterized by a precise graphic identity, this bookcase seamlessly integrates Anastassiades' stylistic approach with the rest of the Collection. Card marks a new chapter in the quest for furniture that embodies the needs of modern living while maintaining a high level of technological innovation. The bookcase combines essential functionality with a contemporary configuration, reflecting Anastassiades' purist and recognizable design ethos. A testament to rigorous research and development, the Card bookcase focuses on intricate details, with each element crafted to perfection. Of fered in black oak, the freestanding structure houses authentic technological marvels, including satin brass finish joints that elegantly connect the horizontal planes to the vertical uprights. Material juxtaposition is a hallmark of Michael Anastassiades' design philosophy, evident in the Card bookcase through the inclusion of a Sahara noir marble shelf. This subtle contrast with the black oak enhances the richness of materials, aligning with the decorative approach of the 2024 Collection. Structurally, the bookcase offers four different compositional possibilities: high shelf, low shelf, console, bedside table.
