ADRIEN — VINCENT VAN DUYSEN 2018

1—
6

Adrien expresses a desire to present a new series of storage units, conceptually avant-garde both in technological and in aesthetic terms. Adrien is a fortunate combination of purity of form and exclusive materials and technologies, blended harmoniously and with a focus on key visual and tactile aspects. This new system of storage units develops the concept of rigorous containers defined by absolute transparency. In Adrien the structural aluminium thickness is reduced to a minimum, allowing the Stopsol glass and the built-in LED lighting system of the shelves to enhance the appeal of the objects displayed. A four- or five-door configuration with just one height. The back panel can be made of wood or glass to highlight the complete transparency of the object. The door, made only of glass, opens thanks to a new patented 95° hinge.

DIMENSIONS

Lighting system

Lighting bars with front LEDs

Internal compartments of Adrien can be equipped with front LED lighting bars. The lighting bar can be mounted on the lids or on the shelves in wood or transparent glass, using the electrified wire strip mounted on the left side panel of the compartment. For each compartment size, we have made specific lighting bars with wiring compliant with European safety standards.

Notes

When ordering, the client must indicate how many shelves with lighting bars are desired.
Individual wire strip is always installed on the left side panel of the compartment.

The lighting bars cannot be used in the presence of structures with drawer.
