## 505 UP SYSTEM — NICOLA GALLIZIA 2021

1—  
31

The 505 UP System, a long-time classic in the Molteni&C range of modular systems for the living area, evolves once again to meet the new styles typical of contemporary living. Nicola Gallizia presents a new door enriched with a full-height handle that becomes a profile decorating the layout. The finishes include coffee oak and the exclusive 3D effect, which can be customised in all colours in the Molteni&C range. The 505 UP System moves further away from the classic bookcase, expanding its possibilities and becoming a modern piece of furniture for a contemporary concept of living.

### Harry's Bar Module

The Harry's Bar module was conceived as a fully independent element, but suspended within the 505 system. Two large doors, boxed or glazed and opening a full 180° by means of an invisible hinge, provide access to the interior compartment finished with wood, ceramic, or Eco Skin, designed to neatly accommodate and store utensils and bottles for all types of beverages.

MODULARITY

Measurements

Wall to wall widths:  
320 - 480 - 640 - 960 - 1280 - 1440 - 1920 + 32 mm for end side panel  
12 5/8" - 18 7/8" - 25 1/4" - 37 3/4" - 50 3/8" - 56 3/4" - 75 5/8" + 1 1/4"

Heights:  
465 - 849 - 1233 - 1617 - 2001 - 2385 - 2769 - (2961 - 116 5/8" for cutting to length) mm  
18 1/4" - 33 3/8" - 48 1/2" - 63 5/8" - 78 3/4" - 93 7/8" - 109"

Structure depth:  
320 - 400 mm  
12 5/8" - 15 3/4"

Notes

A minimum space of 3 cm (1 1/8") in height is required for assembly, and in the case of installation in a compartment, the width is necessary:  
- 4 cm (1 5/8") for floor compositions (2 cm - 3/4" per side)  
- 6 cm (2 3/8") for wall-hung compositions (3 cm - 1 1/8" per side)  
For cuts in the three dimensions (width, height, depth) the reduction is carried out to the millimetre; in all cases the cost of the reduction is borne by the customer.

The module width can be reduced by up to 320 mm - 12 5/8" (centre distance):  
the W 320 - 12 5/8" module cannot be reduced in width.

**No reduction possible for:**  
**Internal and external drawers**  
**Glass hinged doors**  
**Vertical sliding doors**  
**Flap door th 35 (1 3/8")**  
**Modules W 1280 (50 3/8"), 1420 (55 7/8") and 1920 (75 5/8") in depth**  
**Protruding elements DISPLAY D 500 (75 5/8")**

## TECHNICAL INFORMATION

### SIDE PANELS, TOPS TH. 32, BACK PANELS, TV BACK PANELS

Chipboard panel covered in Eucalyptus (*Eucalyptus globulus*) or Oak (*Quercus*) wood veneer, or melamine facing painted in the “Molteni Range” colours.

### GLASS PANELS

8 mm thick tempered glass with front profile in painted extruded aluminium.

### REINFORCED TOP

The honeycomb panel is reinforced with internal iron bars, covered in Eucalyptus or Oak veneer or melamine facing, painted in the “Molteni Range” colours.

### PLINTH

Anodised extruded aluminium, painted in the “Molteni Range” colours or covered in Oak or Eucalyptus wood veneer.

### WOODEN DOORS TH. 22 AND EXTERNAL DRAWER FRONT TH. 22

Chipboard panel covered in Oak or Eucalyptus wood veneer or melamine facing, painted in the “Molteni Range” colours.

### GLASS DOORS

Frame in painted extruded aluminium. 5 mm thick tempered glass in the “Molteni Range” finishes.

### PROTRUDING TOP

Wooden chipboard panel covered in Eucalyptus or Oak wood veneer or eco-leather in the “Molteni Range” colours. Perimeter profile in extruded aluminium painted in the “Molteni Range” colours. If used separate from the composition, the top is equipped with metal brackets for mounting on the wall.

### WOODEN TOP TH. 10

Chipboard panel covered in Oak or Eucalyptus wood veneer or melamine facing, painted in the “Molteni Range” colours.

### GLASS TOP TH. 10

10 mm thick tempered glass painted in the “Molteni Range” colours.

### MARBLE TOP TH. 15

Marble in the finishes in the range with stain-resistant, water-repellent treatments.

### DRAWER INTERIOR SIDES AND BOTTOM

Chipboard panel covered in melamine facing.

### HANDLES AND WIRE HOLES

Made with different materials and finishes.

### GLASS SHELVES

8 mm thick tempered glass, clear.

### BRIDGE BAR

Anodised extruded aluminium.

THROUGH COMPARTMENTS

Two-sided compositions (centre of room) with through compartments

- Through compartment available for modules with max W 960.
- Rear finishing panels starting from the base covering 50% of the structure in height; in the event of an odd number of compartments, 50% plus one compartment.
- It is not possible to fit DISPLAY in through compartments.
- It is not possible to install lights because all the work for the cable routing would be visible on one side.
- Central dividing panels cannot be inserted in through compartments, as the joints would be visible.
- For the W 960 compartment, a reinforced shelf can be fitted at the customer's discretion.

Wall compositions with through compartments

- Through compartment available for modules with max W 960.
- Th. 16 back starting from the base covering 50% of the structure in height; in the event of an odd number of compartments, 50% plus one compartment.
- It is not possible to fit DISPLAY in through compartments.
- It is possible to include lights, but it is the responsibility of the installer to conceal the cable passage in compartments that do not have backs.
- Central dividing panels can be inserted in the through compartments.
- For the W 960 compartment, a reinforced shelf can be fitted at the customer's discretion.

Hanging compositions with through compartments

- Through compartment available for modules with max W 960.
- It is not possible to fit DISPLAY in through compartments.
- It is possible to include lights, but it is the responsibility of the installer to conceal the cable passage in compartments that do not have backs.
- Central dividing panels can be inserted in the through compartments.
- For the W 960 compartment, a reinforced shelf can be fitted at the Customer's discretion.

**Compartments division W 960  
for partial closure with door**

In the case of installing  
a central dividing panel  
H 2 and H 3 modules it is also necessary  
to insert the central dividing panels in the  
compartments below

With the presence of a  
drawer in the lower part,  
provide a reinforced top  
in W 928

## MODULE CONSTRUCTION UP TO W 960 (37 3/4")

Modules must always have full or divided backs 16 th.

Double-sided compositions can be made with back panels. **The presence of back panels or rear finish panels is essential for the stability of the compositions.**

Any requests for modules with opening compartments must be examined by the Molteni Technical Office as they could compromise the stability of the composition.

### Key to symbols

PS - structural shelves

RG - open shelves

RI - internal shelves

BA - base

Z - plinth

Molteni & C

9 —  
31

### DISPLAY positioning

The protruding DISPLAY element can be installed in the same size compartment or in a larger compartment.

The positioning inside the compartment must always respect the 160 mm pitch because it is fixed to the structure D 400.

A central dividing panel or another DISPLAY must always be inserted in the compartments below the protruding DISPLAY element, with the exception of the W 640 module.

In W 960 compartments, the structural shelf below and/or above the DISPLAY must be reinforced.

Only an open DISPLAY can be placed above and below the protruding DISPLAY with flap door.

### DATASHEET

REGISTERED  
DESIGN

2025

MODULES CONSTRUCTION 1280-1440-1920 (50 3/8" - 56 3/4" - 75 5/8")

- For the construction of these modules, it is mandatory to have in each compartment:
- 16 mm th back panel (always in module width)
  - one or more central dividing panels (wood, 32 mm th - glass, 10 mm th or rounded, 12 mm th) positioned at 160 mm intervals at a maximum distance of 960 mm for 1280/1440 mm wide compartments
  - two or more central dividing panels positioned at 160 mm intervals at a maximum distance of 960 mm for W 1920 compartments.

This construction does not require reinforced structural shelves except in cases of installation of the DISPLAY or in other situations indicated in the specific paragraphs.

In the open area, it is possible to make compartments 64 mm higher or lower than the standard module (mm 352).  
For this purpose, 416 mm and 288 mm centre dividers and back panels are available.  
Within a column, the 416 mm and 288 mm recesses must always offset each other.

Molteni & C

10 —  
31

At least two dividing panels per compartment at a maximum distance of mm 960

★ The indicated compartments can be closed with wooden or glass doors using 32 mm th. wooden central partition walls

The maximum height of the wooden panels are 1120 mm (H 3 modules)

Modules W 1280-1440-1920 (50 3/8" - 56 3/4" - 75 5/8") with doors

Compositions with doors

DATASHEET

REGISTERED  
DESIGN

2025

MODULES CONSTRUCTION 1440 - 1920 (56 3/4" - 75 5/8")

Example 1

Example 2

The protruding DISPLAY elements can be freely inserted into compartments without central dividing panels, but with the use of reinforced shelves. The positioning must always respect the 160 mm pitch because it is fixed to the structure.

If you want to close the adjacent side compartment or install a shelf, you need to use the 32 mm th. wooden central dividing panel (see examples).

## MODULES CONSTRUCTION 1280-1440-1920 (50 3/8" - 56 3/4" - 75 5/8")

VW 1280-1440-1920 compartments can be used for the installation of glass doors with glass side panels.  
In this case, the shelves are full size flush with the panels and the central glass dividers are always H 1 module.

Molteni & C

## POINTS OF ATTENTION WITH MODULAR COMPONENTS

Molteni & C

13 —  
31

### Compartments with multiple boiserie panels D 400

The presence of a compartment above and below the boiserie compartment with double panels is mandatory. In addition, the width of the upper and lower shelves **A** must correspond to the width of the panel

★ The lower part of the boiserie compartment must always be finished with a wooden top th. 10 or a protruding shelf D 540 H 72

- A** - The 10 th. wooden top is always of the same size as the wall panelling compartment
- B** - The compartment can be closed with a flap door or drawers following the construction rules

- C** - The protruding shelf can be extended on more compartments in the composition
- D** - The compartment above the protruding shelf cannot accommodate panels of th. 32
- E** - For compartments W 1280-1440-1920 always use a reinforced shelf

### Structure for Harry's Bar

Harry's must always be incorporated:

- in columns D 400
- in columns W module 1280
- between two side panels
- starting from the second module (H 465)

The compartment where Harry's fits is without a back panel because the price of the back panel is already included in the bar module.

The structural shelves below and above Harry's bar module must be reinforced. The 505 UP System compositions with Harry's bar module are wall mounted.

Harry's bar fitted at the side requires a minimum space of 640 mm for door opening. Two Harry's bar can be arranged in the same composition by inserting an W 640 compartment between the two

HOLE DIAGRAM FOR SIDES

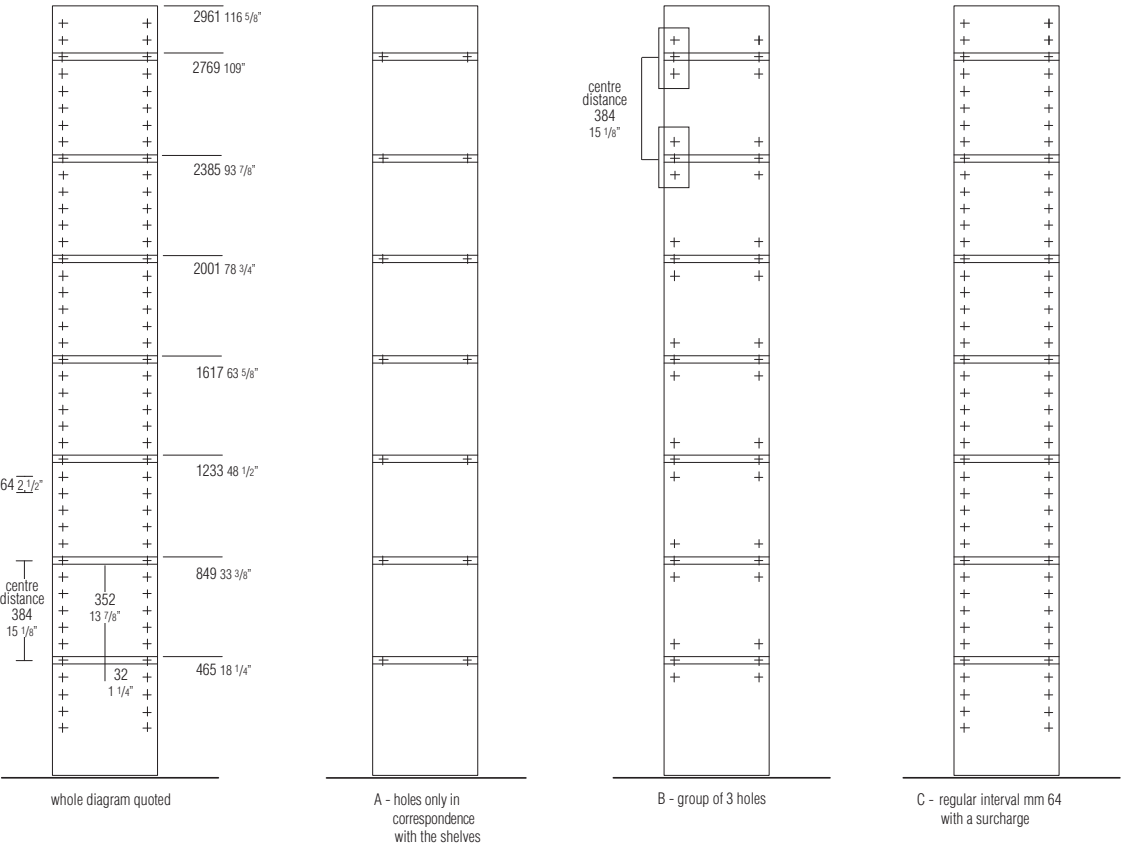

Drilling of panels for shelf positioning is available in these modes to be specified when ordering:  
A - Holes in shelves only  
B - 3-hole set (64 mm centre distance) distance 384 mm  
C - Regular interval 64 mm - with surcharge  
**If there are no specific indications, type B drilling will be carried out - group 3 holes.**  
The individual columns of a composition can have different perforations.  
Within the column the type of drilling cannot vary.

**Notes**  
Wall mounted panels have no holes for shelves in the upper part for mm 400 (see design).  
Central dividing panels H 1 module are always unperforated.

In the open parts, it is possible to make compartments 64 mm higher or lower than the standard module (384 mm).  
For this purpose, 416 mm and 288 mm centre dividers and back panels are available.

Molteni & C

31

DATASHEET

REGISTERED  
DESIGN

2025

## CHANGE OF DEPTH

When the module of the smaller depth is open, the change of depth is made by directly attaching the components of this module to the adjacent panel of the larger depth (**example 1**).

When the module of the smallest depth is closed with doors or drawers, the change of depth is achieved by combining two compositions of different depths (**example 2**).

**Finishing tops in glass and marble cannot be used in situations where there is a change in depth.**

**Any top on composition with change of depth will always be supplied in two parts.**

## CHANGE OF HEIGHT

**With the change in height, the top is used as in the drawing below.**

Molteni & C

15 —  
31

**Change of depth** single composition  
(**example 1**)

**Change of depth** 2 compositions

2025

## BOISERIE COMPARTMENTS WITH MULTIPLE PANELS D 400

By using modules 1280-1440-1920 it is possible to create boiserie compartments with two or three back panels up to W mm 5728.

The boiserie compartment always has two or three removable backs on which the TV can be mounted.

If there is a TV mounted, the client is responsible for paying for the wire hole on the back. The back is fixed on its front. The extension must include the use of the bar even if it is mounted on the wall or the composition is suspended. The backs are hooked in the centre thanks to the central panel connecting support.

The structural shelf above the boiserie compartment is always reinforced.

For sizes greater than 3808 mm, the support bar will be made in two pieces.

The height of the back panel is lower than the height of the compartment to allow the routing of cables from the cavity to the TV compartment (see details A and B).

**TV signal receiver** The ø 18 sensor is always positioned in the lower part of the TV back. Specify right or left when ordering. IR bars can only be placed in a compartment adjacent and/or below the TV back (to be specified when ordering). The cost of a wire passage is not included. The bar can only be fixed to the structural shelves.

### Wire passage

The Hi-Fi compartment may be connected using a wire passage to adjacent or lower compartments. The wire passage is located behind the TV back.

### Reductions

Reductions in width only possible with a back panel surcharge.

Molteni & C

17 —  
31

### Compartments with multiple boiserie panels D 400

The presence of a compartment above and below the panel compartment with double panels is mandatory.

In addition, the width of the upper and lower shelves **A** must correspond to the width of the panel

Panels can only be reduced in width.  
Consider surcharge.

★ The lower part of the boiserie compartment must always be finished with a wooden top thickness 10 or a protruding shelf D 540 H 72

- A** - The 10 th. wooden top is always of the same size as the boiserie compartment
- B** - The compartment can be closed with a flap door or drawers following the construction rules

- C** - The protruding shelf can be extended on more compartments in the composition
- D** - The compartment above the protruding top cannot accommodate panels of th. 32
- E** - For compartments W 1280-1440-1920 always use a reinforced shelf

### DATASHEET

REGISTERED  
DESIGN

2025

TV COMPARTMENTS D 400 (SINGLE PANEL)

Using the module widths 1280-1440-1920, it is possible to create TV compartments.  
The TV compartment is always equipped with a removable backrest on which the TV can be hung. If there is a TV mounted, the client is responsible for paying for the wire hole on the back.  
The back is fixed on its front. The extension must include the use of the bar even if it is mounted on the wall or the composition is suspended.

The structural shelf above the TV compartment is always reinforced.

The height of the TV back panel is lower than the height of the compartment to allow the passage of cables from the cavity to the TV compartment (see details A and B).

TV signal receiver

The ø 18 sensor is always positioned in the lower part of the TV back.  
Specify right or left when ordering. IR bars can only be placed in a compartment adjacent or below the TV back (to be specified when ordering). The cost of a wire passage is not included. The bar can only be fixed to the structural panels.

Wire passage

The Hi-Fi compartment may be connected using a wire passage to adjacent or lower compartments. The wire passage is located behind the TV back.

Reductions

Reductions are only possible for open TV compartments at a surcharge for cutting the back panel (min. reduction H 2 modules) and for bar.

## VERTICAL SLIDING DOORS AND FLAP DOORS TH. 35

The compartments of the compositions 505 UP W 1280-1440 can be closed with vertical sliding doors always in H 2 modules. The lower and upper shelves must be reinforced structural shelves with interruption of the back panel. The vertical sliding door cannot be used in the D 320. For the opening of the vertical sliding door the two upper compartments must be open. The vertical sliding mechanism is fully contained in the 2-module H compartment, or 3-module H compartment if in combination with the flap door. Two vertical sliding doors can be placed side by side. The vertical sliding door can be closed on a protruding shelf D 540 H 72.

### Notes

The price of the vertical sliding door includes the rails attached to the panels.  
On request, without extra charge, the vertical sliding door can be fitted with a type "B" handle centrally located at the bottom.

## PROTRUDING SHELVES D 540 H 72 / H 87 FROM THE FLOOR

Protruding tops can only be used in D 400 compositions.

In floor standing compositions the protruding top can be positioned at a height of 1 or 2 modules, in wall-hung compositions also on the base.

The protruding shelves can be used as a one-sided floor-resting base.

Protruding shelves are placed on the 32 mm structural shelves with the requirement to cut off the back panel, or on the special brackets for wall mounting (**drawing 1**).

The compartment above the protruding shelf must always have a back panel, TV panels or boiserie panels; it can only be closed with a vertical sliding door.

The compartment underneath the protruding shelf is always open.

It is possible to make protruding shelves in one piece up to 2868 mm (two modules of 1440).  
For longer protruding shelves, the joint is always made at a joint (see detail below **drawing 5**).

The shelf above the protruding board in widths 1280, 1440 and 1920 must always be a reinforced structural shelf.

If used as a floor-resting unit of height higher than 2868 mm, make sure two finished elements are placed adjacent to it.

The shelves can be reduced in width when they are free-standing (**drawing 4**) or for the external part of the composition (**drawing 3**).  
Cutting to size is included in the price.

The fixing of the wall brackets is the responsibility of the customer and must be carried out in a workmanlike manner, on masonry walls suitable to support the weight and load of the top.

The price of the fixing brackets is not included in the price of the protruding shelf.

The quantity of brackets to be used for free-standing shelves or shelves outside the composition is indicated in the price list according to the corresponding size.

The **EPA3** wire passage can always be applied in a central position with respect to the lower compartment; in the case of a shelf outside the composition, it is expected to be centred with respect to the projecting measurement. Not suitable for floor-resting base units.  
In the case of Eco Skin shelf, the wire passage will be supplied matt lacquered in a corresponding colour.

PROTRUDING ELEMENTS DISPLAY D 500

DISPLAY protruding elements can only be inserted in D 400 modules.  
Only an open DISPLAY can be placed above and below the DISPLAY with flap door.  
Protruding DISPLAY elements are not reducible.

**Warning:**  
the installation of the DISPLAY in the W 960/1280/1440/1920 modules always requires the use of reinforced structural shelves.

## HARRY'S BAR MODULE

Harry's bar module is available in two versions:  
- with glass doors (transparent stopsol glass or stopsol glass etched)  
- with wooden doors (only for W 1248)  
- with Stripe doors

Options are fitted with 180° hinged doors that open independently of the presence of DISPLAY in adjacent columns.

Harry's is always equipped with internal LEDs (see internal diagram section) with a controlled socket system. For remote control kit (optional) see Living Systems price list on page 72.

### Notes (see structure for insertion)

Harry's must always be incorporated:

- in columns D 400
- in columns W module 1280 / 608
- between two side panels
- starting from the second module (H 465)

The compartment where Harry's fits is without a back panel because the price of the back panel is already included in the bar module.

The structural shelves below and above Harry's bar module must be reinforced.

The 505 UP System compositions with Harry's bar module are wall mounted.

**There can be no reductions of any kind and changes to the planned components.**
